

# Interactive Charting

## For Visual Data Discovery

The new interactive charting feature in MITS Discover empowers users to explore and interact with ERP and other business system data in a chart format without burdening IT.

- **Explore data quickly and on the fly** by changing chart parameters interactively and onscreen
- **Identify root causes and pinpoint anomalies in business performance** by switching back and forth between charts and grid reports
- **Find answers to unexpected questions** by toggling chart elements on and off to visualize their impact
- **Save time, share knowledge, and increase collaboration** by saving and automating chart reports for distribution
